

Motorbike Radiator Cleaner

DESCRIPTION

Motorbike Radiator Cleaner is a concentrate for cleaning coolant circuits. Deposits in the cooling/heating system create blockages for heat exchange and also block thermostat valves and control mechanisms. When engine temperatures are too high, the engine runs uneconomically and suffers excessive wear at considerable risk of damage. Motorbike Radiator Cleaner removes deposits containing oil and limescale, and ensures that the engine runs reliably and at the optimum temperature. Does not contain aggressive acids or alkalis.

PROPERTIES

- Chemical conversion of lime
- Dissolves grease and oil
- Disperses sludge
- Does not attack materials used in cooling systems
- Compatible with rubber and plastics
- Compatible with antifreezes
- Does not contain aggressive acids or alkalis
- Neutralizes acids

TECHNICAL DATA

Form	: liquid
Color	: yellow, clear
Density	: 1.03 g/cm ³
Hazard class	: none
pH value	: 8.7
Solubility in water	: mixable

APPLICATION

Suitable for all coolant circuits. Compatible with all conventional coolant additives and antifreezes.

INSTRUCTIONS

LIQUI MOLY recommends adding Motorbike Radiator Cleaner to the cooling water if problems arise or before changing the coolant. Depending on the level of contamination, run the engine at operating temperature for 10-30 minutes. Drain the cleaner and flush out the cooling system with water. Fill the cooling system according to the manufacturer's instructions. Contents of can are sufficient to treat 5 liters of coolant.

AVAILABLE PACK SIZE

Motorbike Radiator Cleaner 150 ml Part no. 3043 D-GB-I-E-P

PI 00/02/14
