Thank you for buying our product.

1. Remove the original plastic cover in the centre of the top yoke (upper triple clamp).
2. Apply a small amount of dishwashing soap or other lubricant to the o-ring and push the thermometer into position.
3. Due to different variances in the diameter of the recess in the triple clamp, a thinner o-ring is included. Use as needed.
4. Should it become necessary to remove the thermometer, you will find a small recess on one side. This is to help with the initial lifting. Do not use excessive force or sharp objects that might damage the thermometer or triple clamp. Lift Thermometer "square" to the yoke with side to side movements.

General note: Our fittings instructions are written to the best of our knowledge but specifications or details may change. If you have difficulties or have doubts with fitting this part please seek advice from your BMW dealer or workshop of your choice.

Please note that in some cases due to vehicle related tolerances beyond our control some products might need adjusting to fit. We cannot warranty parts fitting in those circumstances.
